

**Hello,**

Fast and totally up to date: from now on the SHL Newsletter will be providing you with useful information about everything to do with automation technology four times a year. As well as our products and their areas of application, the focus will be on technologies and trends. Look forward to new momentum that will propel you automatically to the top!

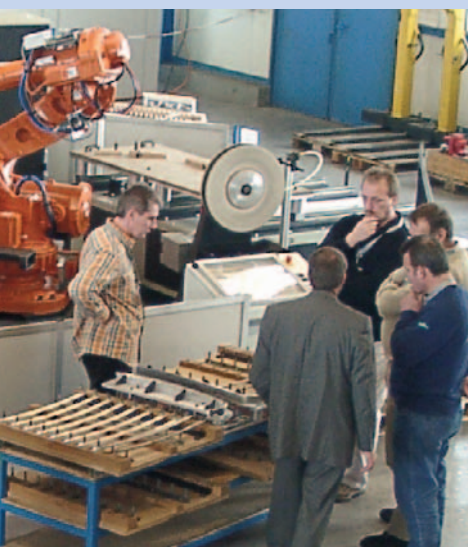

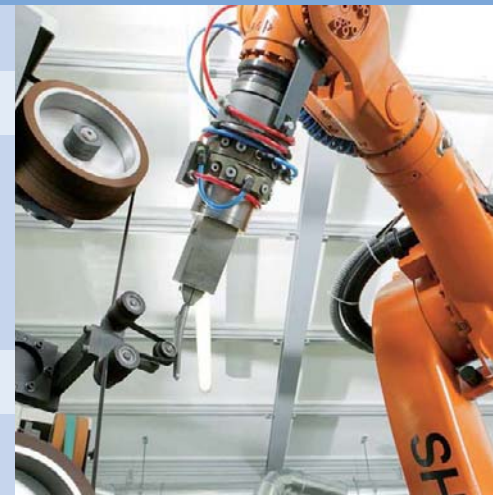

### **Free-belt and contact wheel grinding machine FKS 250/450 ROB**

Grinding, polishing, deburring? Milling, brushing, measuring? Loading and unloading, assembling, palletizing? For all of these, SHL offers the right machines and systems. For more information on our innovative free-belt and contact wheel grinding machine FKS 250/450 ROB and its practical use, just contact our sales staff.

### **For Aesculap: grinding and polishing of artificial hips**

A convincing solution from SHL that is uniquely efficient. Our customer Aesculap has secured sustainable savings thanks to the grinding and polishing system based on two Kuka robots that was implemented for them in its entirety by SHL.

### **A highlight in 2009: Technology Days at SHL**

Visit us from June 18 to 19 at our headquarters in Böttingen! As part of our Technology Days we will be giving you information about the latest developments in surface processing with integrated industrial robots and tailored automation solutions for the most varied sectors. There will also be lectures by experts and discussion rounds with partners.

**Even more service competence**

As of February 1, 2009 Mr. Stephan Fürst has been a member of our After Sales Service team. Mr. Fürst spent the past four years in the field as a service technician for SHL. During that time he gained sound know-how with regard to SHL automation solutions. We look forward to providing you, our customers, with even more expert service. In individual cases it will be even more powerful and efficient. If you still don't know about our Tele-Maintenance service tool, then get in touch with our team at the Service department. We'll be glad to tell you about the benefits it brings.

You'll find more information at our website [www.shl-automatisierung.com](http://www.shl-automatisierung.com)
