

Dear Ladies and Gentlemen,

With this edition of the SHL Newsletter, we are providing you with all the latest news, plus the facts and figures that are relevant to the business sector we share with you.

Thanks for your interest!

### Perfect Teamwork: Epp-Industrietechnik heads for the SHL technology.

An innovative process solution gives Epp the chance to process metals and plastics in a highly precise and comprehensive way – including design polish. The system, individually designed and installed by SHL, opens up new markets and a new clientele to this Southern German parts & system supplier.

The company Epp-Industrietechnik has acquired a good reputation throughout the industry – from automotive to aerospace. Epp offers their customers prototypes, both individual and series production in the welding, sawing, turning and milling of parts.

### More information

### SHL Polishing Machine, model P 1000 ROB: expertise in a compact form.

Once more SHL underlines their advancement in "automated polishing": For engineering, this polishing machine (model P 1000 ROB) has been the focus in the latest findings and results achieved in the polishing technology.

The model "P 1000" is best suited for polishing profiled pieces and molds made of metal wood or plastic and including pieces with complex contoured lines. Other advantages include the exceptionally compact construction of the machine and variable speed settings.

## SHL Training Center: get qualified with the experts.

Training on a regular basis is an investment in the future. Optimally trained workers are more efficient and experience greater motivation, because their contribution to the productivity and success of the company is more substantial.

Get first-hand, up-to-date expertise: in the fully-equipped SHL Training Center, skilled workers can gain specific know-how in grinding and polishing. Your personnel are taught how to program robots by experienced trainers with modern machinery and equipment. We offer training courses for different types of robots and, if necessary, we'll even visit your production site.
