

More efficiency and productivity – by off line simulation and programming.

As has always been the case, the SHL know-how is value added. We're ready to do a comprehensive conceptual pre-study for you.

We determine:

- feasibility
- room situation
- collision risk
- cycle time

Another way to enhance your productivity is by offline-programming. It can be done parallel to your production!

The advantages are:

- shortened setup times.
- a higher path accuracy.
- avoid rejects – and improve quality.
- quick adjustments to path and process modifications.

Make a pleasant experience out of your next project: Our service team is ready to receive your call and answer your questions.
